- 26 males by (21%)
- 93 females by (77%)

Number of cases in Zagazig branch: 63 cases.

Number of cases in Alexandria branch: 58 cases.

Thirdly:

General remarks:

- (120 cases) of life foundation's cases outside Drosos project had not been entered as data and work ongoing to enter it.
- During monitor a report on places of detention it turns out the following:
 1. As we documented that Prisoners are serving their sentences in non targeted prisons of project for a long time and then they are moved to prisons in their residence in

targeted governorates of project of one to two months before their release.

- According to there are a large number of cases who their residence in the targeted governorates of project so we find that there are cases in police stations and centres and places of transferring prisoners in the targeted governorates of project.
- There are two cases are exempted from age criterion because of their need to join the program and they met the remainder criterions of program.
- There are 7 years we don't know their ages because of there are no documents confirming their identity, work ongoing to obtain it.
- Those cases are categorized within the age categories based on the following:
 - initial interview with the informer and his assessment of case's age without official identity documents.
 - Program doesn't support the feature of abolishing the age criterion because that may cause an imbalance later.
